

1 List of Useful Commands

- Exit out of terminal :q :q! or ZZ to save or :w to save without exiting vim
- Insert Mode → Edit Mode : Esc key
- Edit Mode → Insert Mode : i
- Undo : u
- Ctrl-R : redo
- delete the next lines :+ ,+2d This is a range from + to +2 from current line ,delete
- dG delete all to end of file
- Ctrl V select lines, then enter ↵

Weird issue that kept telling me that swap file exist. in the end, I just did E (edit) then did: :call delete (".vector.py.swp") can not do rm in shell since it seems to be hidden somehow.

2 vimrc

- vim _vimrc
- vimrc is a file where all your customization to vim is made
- Change to use jj to leave insert mode
Original: ↵ESC↵
!noremapjj ↵ESC↵!
- Changing leader key
Original:
let mapleader= ", "
for executing shortcuts
